Cats

Bailey H. 12th Grade

A house cat's genome is 95.6 percent tiger, and they share many behaviors with their jungle ancestors. Cats are believed to be the only mammals who don't taste sweetness. Cats are nearsighted, but their peripheral vision and night vision are much better than humans. Cats have an extra organ that allows them to taste scents in the air, which is why your cat stares at you with her mouth open from time to time. A group of cats is called a clowder. They have over 30 muscles that control their ears. Cats sleep for about 70% of their lives. Their nose is just as unique as a human's fingerprints. A cat's brain is about 90% the same as humans. Cats have a third eyelid called a haw.

Fall in the Midwest

Elizabeth N. 12th Grade

Fall is almost here and to most people in the Midwest fall can be known as the favorite season of them all. I mean who wouldn't love a break from the humid summers, the very cold winters, and the wet springs. Fall is the perfect mix of it all, minus the wetness. It has cold nights and mornings, but a comfortable temperature, between 50 and 70 degrees during the afternoons. It's good enough weather so you can wear basically anything you want, ranging from t-shirts to flannels and from shorts to pants. To make the season even better the leaves change from bright green to either a beautiful red, orange, or yellow color. And the ground becomes filled with leaves, the grass begins to turn brown, and it just gives a great aesthetic for anyone to look at. Another bonus of the season is the holidays because they also really make the season. The main two you think of are probably

Halloween and Thanksgiving, both having very different vibes to them. One gives off a spooky scary vibe, the other gives off a vibe of being grateful for all the different things we have in life. But even with them both having different vibes they still make up the wonderful fall season that lies ahead. And even if fall isn't your favorite season, you still can't deny that it's a beautiful time of the year and has many things to look forward to when it does finally come around again each year.

Hockey

Keane M. 11th Grade

Ice hockey started in Montreal Canada and spread all around Canada. British soldiers were the main reason it became popular because they would play lacrosse and field hockey in Great Britain and places in Europe then when they went to Canada, they played it but on frozen lakes they played it to stay in shape and to pass the time. Then it gained popularity and became the most popular sport in colder climates like Russia and northern parts of the United States now the game is popular, so they put it as an Olympic sport for almost every country. The NHL was created November 26, 1917, the NHL was created with four Canadian teams now over many expansions of how many teams they finally stopped adding teams and now there are 32 teams in two conferences and four divisions. Each team typically has 82 games with 41 home games and 41 away games. The top 3 teams in each division will go to the playoffs with 2 wild-card teams in each conference they play a best of seven then the winner goes on to the second then the third round is called the conference finals then the winner goes to the Stanley cup finals

Diesel Engines

Noah W. 9th Grade

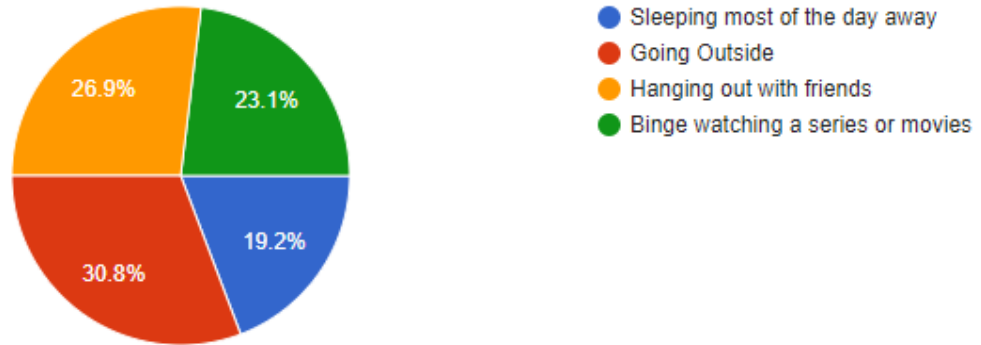

Diesel engines are everywhere, they're in trucks, cars and tractors but why use diesel over traditional gasoline. These types of engines have better acceleration than their gasoline counterparts. They have a larger towing capacity because they have the capacity to deliver more torque than gas powered vehicles. Diesels have better fuel economy because diesel fuel is more energy dense than gasoline which means more energy per gallon, and they get around 50 more miles per gallon than gas. Why do we use DEF (Diesel Exhaust Fluid) in modern day diesel trucks? It helps diesel exhaust reduce nitrogen oxides and other harmful emissions into the environment. They also use DEF because it is mandatory by the federal government.

Sports Update

Varsity football had a game on Friday the 13th against Bagley and they lost 21-22. The JH boys had a Football game on Thursday the 12th against Mahnomen and lost 8-28. In volleyball action The ABC team and JH had a game Thursday the 12th against Warren Alvarado Oslo and had a clean sweep.

How do you spend your Weekend?
