Description of district's efforts to screen and identify dyslexia

NWEA (MAP) will be given in the Fall, Winter, and Spring to all K-2 students and in the Fall and Winter to all 3rd grade students. During these times, low scores on the NWEA (MAP) test followed by persistent, inadequate progress, in spite of instruction that has been effective with other students with similarly low initial scores, may indicate the need for more in-depth assessment to diagnose a reading disability, such as dyslexia.

Description of district's efforts to screen and identify convergence insufficiency disorder

When a teacher notices frequent loss of place, squinting, rubbing closing, or covering an eye, trouble remembering what was read, sleepiness during the activity or students complain of eyestrain (especially with or after reading), headaches, blurred vision, double vision, inability to concentrate, words appear to move, jump, swim, or float, parents are contacted and encouraged to see further eye screening with a qualified eye care physician.
