APRIL  
**AUTISM**  
AWARENESS MONTH

## AUTISM FACT SHEET

70 Million individuals worldwide have Autism. CDC estimates that an average of 1 in 36 children in the U.S. has ASD or autism.

### BASIC INFORMATION

Autism is the fastest-growing developmental disability in the United States.

Over 7 million individuals in the United States are autistic.

Autism is a lifelong disorder. It doesn't go away when you become an adult.

### AUTISM IN MEDIA

Rain Man has the most Oscar wins of any autism-related film.

Some celebrities with autism include Dan Aykroyd, Susan Boyle, Daryl Hannah, Temple Grandin, and John Elder Robison.

### IMPORTANT FACTS

Children with autism, like all children, are different in their behaviors and abilities. No two children with autism will have the same symptoms.

Autism is often labeled as a social and communication disorder, although some with the diagnosis may deal with other challenges such as sensory, cognitive and motor issues.

Therapies currently suggested to help individuals with autism include: Music therapy, Theatre therapy, Early Start Denver Model, Visual Schedules, Sensory Integration therapy, Applied Behavioral Analysis, Social Story Therapy, Pivotal Response Treatment, and Cognitive-Behavioral Therapy.

### DIFFERENT, NOT LESS

Many individuals with autism are self-advocates in their community. It's important to remember individuals with autism sometimes see autism as a part of who they are. Dr. Temple Grandin - one of the most renowned autism advocates in the world - says it best with her quote "Different not less."
