### Lake of the Woods Minnesota

Ayden O. Grade 11

Lake of the Woods is the sixth largest lake in the United States, after the Great lakes. Lake of the Woods drains into the Winnipeg River and then into lake Winnipeg. Then it flows down the Nelson River into the Hudson Bay. Lake of the woods separates a small land area of Minnesota from the rest of the United States. The Northwest Angle and the town of Angle Township can be reached from the rest of Minnesota only by crossing lake of the woods or going around through Canada. The Northwest angle is the northernmost part of the contiguous United states. Lake of the Woods, a translation of the original French name Lac des Bois, got its name from its wooded setting.

Here are some facts about Lake of the Woods. It crosses two provinces and one international border. It is 310 feet deep. It is 85 miles long and 56 miles wide at its widest point. It has an area of 1,727 miles. It has a longer shoreline than Lake Superior. It was an important trading route between the great lakes and Canada. It is a top fishing destination for anglers all over the world.

### Octopus

Veronica R. grade 11

Octopus is a soft bodied sea creator with 8 legs. Octopus don't have any bones in their body, they have a hydrostatic skeleton letting them be very flexible. The hardest part of their body is the beak that's sharp and parrot-like. The beak is located on the underside where the arm meets. Their beak is so strong that scientists found out their predators that eat them won't digest in their stomachs. They have unique abilities like squeezing

into small spaces you wouldn't think they would fit. They can even fit into gaps as small as a coin. Octopus have 9 brains and 3 hearts they are very intelligent they can complete puzzles, untie knots, escape aquariums even outsmart humans. They even have great memories remembering stuff from months ago. Octopus are masters at camouflage; they change in a blink of an eye helping them match their surroundings to protect themselves from prey and sneak up on their own prey. They can also control the size of projection on their skin called papillae. When octopus become pregnant, they search for a den comfortable and hidden enough from prey from there they stay there until the eggs hatch. They won't leave the den even for food, basically starving themselves to death just to protect their eggs.

## Baltimore Ravens

Tiyaz D Grade 9

The Baltimore Ravens are a professional American football team based in Baltimore. The Ravens compete in the National's football league as a member of the American football conference north division. The team plays at M&T bank stadium and is headquartered in Owings Mills Maryland. The Baltimore Ravens were established in 1996 after Art Modell, then the owner of the Cleveland Browns, announced plans in 1995 to relocate the franchise from Cleveland to Baltimore. As part of a settlement between the league and the city of Cleveland, Modell was required to leave the Browns' history, team colors, and record in Cleveland for replacement team and replacement personnel that would resume play in 1999. In return, he was allowed to take his own personnel and team to Baltimore, where such personnel would form an expansion team. Therefore, the Ravens were the only franchise in any of the major American team sports which did not carry forward the records of the team as it existed prior to its move to a new location. The Ravens have been one of the most successful NFL franchises since their inception, compiling a regular season record of 263-197-1, the second highest among active franchises. They also own the fourth-highest playoff winning percentage at 17-13. The team has qualified for the NFL playoffs 15 times since 2000 with two super bowl titles (super bowl XXXV, super bowl XLVII), two AFC Championship titles (2000 and 2012), five AFC Championship game appearances (2000, 2008, 2011, 2012, 2018, 2019, and 2023). They are one of two teams to be undefeated in multiple super bowl appearances.

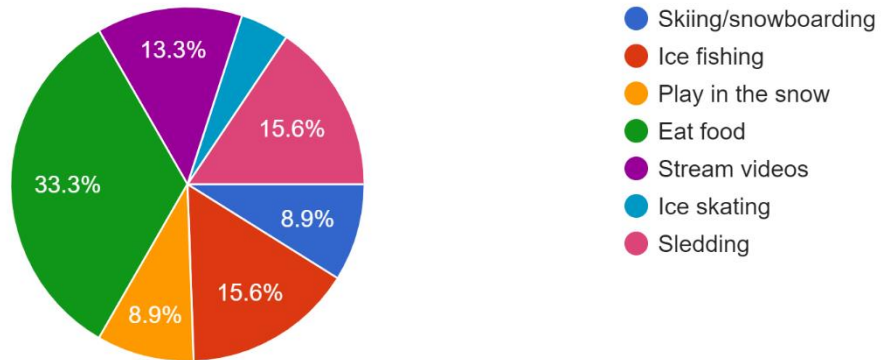

## Miami Dolphins

Ean E. Grade 9

The Miami Dolphins are a NFL team in the AFC East and have a record of 5-6 this year and putting them in second in their division behind the 9-2 Buffalo Bills but ahead of the 3rd in the division 3-8 New York Jets and the 4th 3-9 New England Patriots. They have beaten the Jacksonville Jaguars 17-20 New England Patriots twice, first game 10-15 second game 15-34 Los Angeles Rams 15-23 and Las Vegas Raiders 19-34. Then losing to the Buffalo Bills twice first time 31-10 second time 30-27 Seattle Seahawks 24- 3 Tennessee Titans 31-12 Indianapolis Colts 16-10 and finally Arizona Cardinals 28-27. They were expected to have an amazing year, but they have been very injury prone, and Their quarterback Tua Tagoavaiola got his 5th concussion in his NFL Career. In 1972 The Miami Dolphins did what everyone thought was impossible to have a perfect season and win the super bowl in the same year. In 2019 They also tampered with Tom Brady and got their first-round pick taken away from them.
