## **Articles:**

### **Graduation**

Michael Egeland Grade 12

It's that time of year again spring is here summer is on the way. Graduation marks the end of another school year and the beginning of summer vacation, some for the last time as these students enter the adult world. The Class of 2024 graduation will be on Friday May 17th.

The Graduation ceremony will take place at 7pm at Fisher Public School. The ceremony will be taking place to commemorate and congratulate the graduating senior class of 2024. The fourteen graduating students will be starting a new chapter in their lives, moving onto better things and we wish them the best.

### **Getting Ready for Prom**

Laressa Laurie 12

For boys, getting ready for prom is no big deal. They put on their suit 20 mins before leaving and call it good. For girls, well that's a whole different story. Some girls start getting ready days in advance. They get their hair colored, their nails done, and self-tan. They have to book appointments to get their hair and makeup done even months in advance. Don't even get me started on finding a dress. It takes some people forever to find the perfect dress. The day of most girls start to get ready in the morning. Most likely starting on their hair and then makeup. It takes a good three to four hours to get ready that day. Although it sounds like a lot, the most fun part about prom is getting dressed up. There are not many occasions where you get dressed up like that. It's so fun getting ready with a big group and taking pictures. It's sad that seniors will never get to experience a prom again, but I'm grateful for the memories I got to make before, during, and after prom. I hope everyone who went had a great time!

### **Moose**

Natalie Laurie Grade 9

The moose or elk is the largest, tallest, and heaviest species of deer, it is the tallest land animal in North America. They weigh 840- 1500 lbs. for males and 440- 1100 lbs. for females, for an adult moose their height is 4.6- 6.9 feet tall at the shoulder. They live up to 15-20 years of age.

Moose are pretty fast; they can get up to speeds of 35 mph. Their population is least concerning, and it is growing. Despite how big they are they are herbivores, meaning they only eat plants.

Their main predators are wolves, bears, and humans, but in some cases wolverines, they go for the legs, and orcas, although rarely moose are very good swimmers and sometimes go swimming in the ocean.

## Mayday

Brock Marshall Grade 9

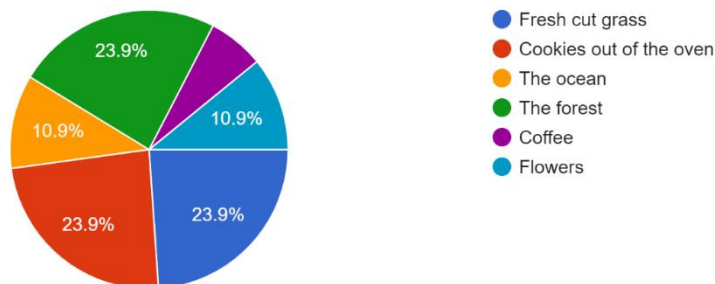

May Day, a day commemorating the historic struggles and gains made by workers and the labor movement, is observed in many countries on May 1. In the United States and Canada, a similar observance, known as Labor Day, occurs on the first Monday of September. Labor Day in the United States Learn the origin of Labor Day in the United States. In 1889 an international federation of socialist groups and trade unions designated May 1 as a day in support of workers, in commemoration of the Haymarket Riot in Chicago (1886). Five years later, U.S. Pres. Grover Cleveland, uneasy with the socialist origins of Workers' Day, signed legislation to make Labor Day—already held in some states on the first Monday of September—the official U.S. holiday in honor of workers. Canada followed suit not long afterward.

## Sports Update:

Wednesday May 1<sup>st</sup>, Climax-Fisher track team competed in Dilworth, MN. In the 100-meter dash, Jaycer Davis placed 8<sup>th</sup> with a time of 11.99, Alex Reitmeier placed 19<sup>th</sup> with a time of 12.72.
