- May 24<sup>th</sup> – Junior Cookout
- May 25<sup>th</sup> – Elementary Track & Field Day
- May 26<sup>th</sup> – Pre-K and Kindergarten Graduation
- May 27<sup>th</sup> – Last Day of School!!

## **K Pop**

Michaela Richards Grade 12

K-Pop (Korean popular music) is a genre of music that originated in South Korea. Though it hasn't existed for very long, it's made a huge impact not only in Korea, but the entire world. There are several famous groups that many are most likely familiar with. Boy group BTS and girl group BLACKPINK have established themselves as household names in many countries due to their massive popularity. Other popular groups (but not limited to) include EXO, TWICE, BIGBANG, Red Velvet, GOT7, Stray Kids, Monstah X, and NCT.

Despite its more recent popularity, K-Pop has existed for many decades. The first traces of K-Pop can be found back in the 1950s, when the girl group The Kim Sisters made their debut. And like the hippie movements that protested against violence and war in 1960s-1970s America, Korea had its own active peace and antiwar movement during those years. Kim Min-ki was especially known for his contribution to the movements with his music.

Korea was discovering new styles of music like hip hop, r&b, rock, folk, and others that would lead to the first creations of Korean Popular music. K-Pop isn't limited to just one genre of music. The K-Pop we know today was mostly inspired by the emotional ballads that were very popular in Korea in the 80s and 90s, as well as other genres popular in western culture such as folk, soul, hip hop, R&B, rock, etc. Seo Taiji and the Boys are one of the first and most inspirational K-Pop groups to date because they would often break the traditional standard for music in Korea by using western genres (mostly rap and hip hop) in their music. Their song I Know is seen as the first inspiration for what K-Pop is today by inspiring famous groups like BTS. Like pop music in the west, K-Pop is often defined by its popularity. By incorporating western-based genres into their songs, K-Pop began to receive recognition all around the world. The most recognizable example of this would be the popularity of the song "Gangnam Style"

## **May 20th, 2022 → Graduation**

Aliana S. 12th grade

I honestly did not think I would be writing about how my class is graduating, and we are graduating today! I remember how in 8th grade all we wanted was to graduate and be done with school, but now that we are almost done it all feels so surreal. It will be a very emotional night for us when we finally walk the stage and never look back and only look forward. My classmates and I have been through so much together and we made it! School would not have been as fun if we didn't have teachers who had a sense of humor or who pushed us to be better people and to succeed. I will for sure miss all my teachers, especially the ones I had class with every single day the last five years. I made so many memories in the last five years of high school, I made friendships with everyone, so being able to see the underclassmen be proud of us and hearing them say we made such an impact in their life it is a very good feeling to know that. The grades below us look up to us and see us succeeding and doing amazing things in our life which will make them want to do the same. I cannot wait to see where our future holds for my classmates and me.

## **A Short History of Peanut Butter**

Alex Hammer Grade 10

The history of peanut butter begins with the Incans. They began grinding up peanuts hundreds of years before us. Of course, it wouldn't become the phenomenon that we have today from Jif to Skippy, Peanut Butter is everywhere and in almost every household save for the unfortunate few with nut allergies. However not a lot of people know the real history of peanut butter, so I'm here to tell you.

Peanut butter first reappeared in the modern world after an American nutritionist and cereal pioneer named John Harvey Kellogg patented a proto-peanut butter that he called a food compound from boiling and grinding peanuts into an edible paste. However, this patent didn't specify what kind of nut to use, and this paste was bland and usually disliked by his patients.

Still, he did manage to sell a few jars and bottles of peanut butter pressed in the shape of leaves, which his patients would eat while they'd read some pamphlets that he called milk-books. These milk-books were just a bunch of pictures with words on them because John Harvey Kellogg didn't know how to read, he had learned how to speak.

He was truly a genius in his field, but since then other scientists have continued to improve on peanut butter as we know it today.

## **Graphic Designers**

Bailey Hartje 9<sup>th</sup> grade

Graphic Designers work with both content and pictures. They regularly select the sort, textual style, estimate, color, and line length of features, headings, and content. Realistic architects moreover choose how pictures and content will go together in print or on a webpage, counting how much space each will have. When utilizing content in formats, realistic architects collaborate with scholars, who select the words and choose whether the words will be put into sections, records, or tables. Through the utilization of pictures, content, and color, realistic originators may change information into visual illustrations and charts to create complex thoughts more accessible.

## Kids Thoughts

What are you most excited for this summer?

Corban – Camping

Bryson – Throwing acorns at squalls

Jovanni – Going over to Bryson's

Damian – My trip to Duluth

## Weekly Poll 35

What are most excited for this summer?

58 responses

- Going to the lake/camping
- Going to the fair
- Fishing
- Having bonfires
- Kayaking
- Go on bike rides
