Star Wars

Michael Egeland 12th Grade

Star Wars is a legendary saga that began in 1977 with the release of the first movie, Star Wars: Episode IV - A New Hope. Created by George Lucas, the story is set in a galaxy far, far away and follows the adventures of characters like Luke Skywalker, Princess Leia, and Han Solo as they battle against the Empire led by Darth Vader. The success of the original film led to the creation of two sequels, "The Empire Strikes Back" and "Return of the Jedi," forming the original trilogy.

Over the years, the franchise expanded with prequels, sequels, animated series, novels, comics, and merchandise, captivating generations of fans with its rich universe and timeless themes of heroism, redemption, and the fight between good and evil. Star Wars is super popular and has had a big impact on movies and what people like.

Read Across America

Elizabeth Norheim 11th Grade

Read Across America is a year-round program that was made by The National Education Association in 1998. They started it to celebrate not only reading, but also Dr. Seuss and his impact on the reading world. The annual event starts on March 2nd or most commonly known as Dr. Seuss's birthday. It then goes until March 6th, but the whole month is dedicated to reading. There are many different events that schools will put on in

celebration of this event. The most common ones you will see are guest readers that come in to read a book for each grade, Green Eggs & Ham breakfast, book scavenger hunts, and many more. In conclusion, don't forget to try and read a book next month.

Our Early Spring!

Kaydee Volker Grade 11

As we all know, this winter in Minnesota has been good with little to no snow and warmer weather. As of right now we are on pace with one of the warmest winters on record, the temperatures are around 13 degrees warmer than normal this winter so far. While we are having this warmer winter, other areas of the United States are having a different type of winter, where it is colder and rainier. Overall, this El Nino winter that we are having is playing out as it was said to be! These next few weeks so far going to be warmer, and we'll get on track to an early spring in much of Minnesota!

Facts about Mexico

Emma Schultes Grade

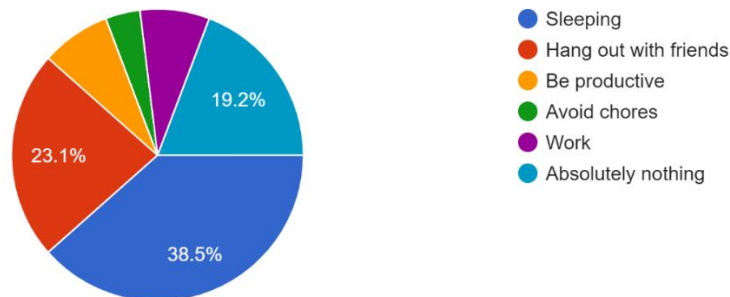

Mexico is in North America and borders the bottom of America. The population of Mexico is 127.7 million people, and 69 different languages are spoken. The most common being Spanish. And there is no official language in Mexico. There is a growth of .1 in the population per year. The word "Mexico" means "The Navel of the moon". The world's largest pyramid is located in Mexico (by volume) and has 30 more pyramids. The capital of Mexico is Mexico City. Mexico City is also one of the world's largest and oldest cities. Mexico City is built over a lake. And is actually sinking! It sinks 10 inches a year because it is being built on a lake. The country Mexico has the largest number of taxicabs is Mexico. They are big coca cola consumers there. Mexico is the top Latin America travel destination. The world's largest tamale came from Mexico being 164 feet long. Tamales are most popular here.
